

### **Cross Bones**

My bones are lying at the crossroads  
There my spirit shall remain  
The grief of a world I do not love anymore  
I fear too much for me to take  
My dear lost Anna and her lullabies  
I'd say we'll never meet again  
My ghost has been here  
For ten winters now  
Alas, If only I'd have known  
I fired my rifle and I claimed this world  
I worked my shoulders till they ached  
Never to toil in these fields anymore  
I escaped the only way I knew  
Well, my spirit rose awake one day  
Just in time to hear the preacher say  
I was laid to rest upon a holiday  
Lay this fella in the ground  
Remove his head and put him upside down  
and salt the Earth so his corpse won't make a sound  
Hang this cross up in a tree  
So the spirit of his wife might see  
That we tried our best to help her husband find his way  
So, my bones are lying at the crossroads  
There my spirit shall remain  
The grief of a world I do not love anymore  
I fear too much for me to take

### **Custom Life**

Gather these things that we covet  
And over these things we hover  
Do we still need friends?  
Occupy all of our senses  
Lower our eyes and defenses  
Do we still need friends?  
So, plug in the window and watch it  
Draw the curtains so the glare can't stop us  
Do we still need friends?  
Depart for a while and take nothing  
Leave for days by just pushing buttons  
Do we still need friends?  
You and I, well, me and my custom life x2  
Can't handle the crowds so we log in  
To socialize without even talking  
Do we still need friends?  
So build us a cage cause we want it  
Then close us in, bar it and lock it  
We are such good  
You and I, well, me and my custom life x2  
We build walls  
We build them all of the time  
You can't break them  
Or change them  
Cause they're mine

### **Forest Fire**

Cold nights leaves die and it's not even autumn  
We'll all be getting warm down by the forest fire  
So, come join us  
With no light in the night sky to guide we will wander  
The wind whispers for us to beware and we oughta  
So, hold tight, breathe light, as breathing gets harder  
The air is thick with chemicals it bears from our fathers  
Lakes dry, there's no tide, remembering water  
When the dust clouds settle will we still be here  
Will we wanna?  
Closed eyes, sleep tight and we'll dream forever  
Drifting off from our conscious thought

### **The Fifth of May**

On the fifth of May, I started to say  
I saw her alive earlier that day  
She came up to me had asked for a ride  
Already a few deep I was in no shape to drive.  
So, I turned and I slurred inquiring as to why  
But, she was already gone in the blink of an eye  
On the fifth of May, I started to say  
I saw her alive.....I saw her alive  
Like a silhouette of a shadow  
(Backing: On the fifth of May, I started to say...I saw her alive)  
On the fifth of May and every year on that day  
She stalks through the town, an unnatural display  
She yearns for concern with emotionless eyes  
and beckons toward the wood, as if some clue to her demise  
On the fifth of May, I started to say  
I saw her alive.....I saw her alive  
Like a silhouette of a shadow  
(Backing: On the fifth of May, I started to say...I saw her alive)"

### **Valley**

Between lives there's a valley  
Below the peaks it's overcrowded  
Our hearts and souls were boundless  
Yet this graveyard has found us  
In...oh in the valley we're going nowhere  
We're growing old and losing our hair  
Where gravity has touched all our hearts a bit too much  
It takes a stride to get going  
Though the terrain may be foreboding  
Ambition for something different  
Makes this a mission for the top  
Every step it gets easier  
You'll see the air up here is cleaner  
Every mile's a little freer  
On the path to better off  
In...oh in the valley we're going nowhere  
We're growing old and losing our hair  
Where gravity has touched all our hearts a bit too much

You may need a guide to reach the summit  
For support and motivation  
The view at this elevation is a welcome revelation  
In...oh in the valley we're going nowhere  
We're growing old and losing our hair  
Where gravity has touched all our hearts  
A bit too much

### **Mullin Shetland's Body**

Well, my musket's attached to a powerful hose  
and they crank in the steam when the enemy shows  
We're a firing line  
(backing) a firing line  
A battalion of guns, a hundred feet in the sky  
Take a look to your side  
Every three men alive  
Only one will remain at the end of the fight  
We're a firing line  
(backing) a firing line  
A battalion of guns, a hundred feet in the sky  
Well, you play it just right, the bullets avoid your body  
Well, you say it just right, you might survive the fray  
So, fire away boys, fire away and we'll see  
Who survives  
Yeah, fire away boys, fire away and we'll see  
Who survives  
Anyway  
Well, they say hell awaits, or heaven awaits  
When they sound the alarm  
and they open the gates  
Take a firing line  
(backing) a firing line  
A battalion of guns, a hundred feet in the sky  
For the ones that survive, we all get a prize  
A shiny new medal to pin on their chest  
I got seven on mine  
In a (backing) firing line  
A battalion of guns, a hundred feet in the sky  
Well, you play it just right, the bullets avoid your body  
Well, you say it just right, you might survive the fray  
So, fire away boys, fire away and we'll see  
Who survives  
Yeah, fire away boys, fire away and we'll see  
Who survives  
Anyway  
Disith bullets will avoid Mullin Shetland's body  
(backing) Disith bullets will avoid Mullin Shetland's body (x3)  
You play it just right and the bullets avoid your body  
Well, you say it just right, you might survive the fray  
So, fire away boys, fire away and we'll see  
Who survives  
Yeah, fire away boys, fire away and we'll see  
Who survives  
Anyway

### **Other Side of the Gate**

Life...  
Taking lives for a stone  
Just to have your own life  
Ruining plans by taking lives for a stone  
Just to have your own life  
Ruin our plans by taking our lives  
Well you should go and take your own life ruining plans by taking our life  
This evil mind is a piece of mine and now it's  
Out of control and it's out to get me  
Her face and eyes I recognize but there's an  
Ouroboros on this homunculi and it's  
Too late to try and reconcile with this soulless product of our  
deal with the  
gate child with  
The remains I find I'll paralyze  
Then destroy this monster that we brought to lifeless  
And she'll glow, vaporize and go  
Life...

Taking lives for a stone  
Just to have your own life  
Ruining plans by taking lives  
For a stone just to have your own life  
Ruin our plans by taking our lives  
Well, you should go and take your own life ruining plans by taking our life  
If my troubled mind is occupied I've got this  
Suit of armor always at my side I'm not a  
Military dog on the front lines I've got my  
Own agenda so I play both sides  
Her face and eyes I recognize but there's an  
Ouroboros on this homunculi and it's  
Too late to try and reconcile with this soulless product of our deal  
with the gate child with  
The remains I find I'll paralyze  
Then destroy this monster that we brought to lifeless  
And she'll glow, (vaporize and go) x3  
Life...

Taking lives for a stone  
Just to have your own life  
Ruining plans by taking lives  
For a stone just to have your own life  
Ruin our plans by taking our lives  
You should go and take your own life ruining plans by taking our life

### **Violence and Instruments**

Play, just don't leave me out  
All I ever wanted was for you and I to stand on solid ground  
Oh, and don't drag me down  
'cause I've already sunk up to my neck  
This quicksand used to be my town  
They know, and I know that they know,  
If situations that arise  
Can find sustenance  
We know where they are bound

Oh, we created this and we hate this  
Oh it's always the other side that can see in  
Wait, offshore in this boat  
I promise no more promises but swear this is the last breath that I'll hold  
And stare, stare out the window  
And look upon the world with perfect vision but see nothing there at all  
And cold, a cold that is painful  
The kind of cold that's cured by  
Violence and instruments  
And a soundtrack will unfold  
Feet, buried in concrete  
Bound and gagged and tossed  
Over the side by my first mate  
We created this and we hate this  
Oh it's always the other side that can see in  
That can see...in...oh  
That can see in  
That can see in...oh

### **Master Sargent Leaving**

The sea is full of the dead and the dying  
Mothers and daughters are crying  
I don't care what you say  
Captain, take me away  
Leaving this battle, am I  
In the town  
The lords and ladies are lying  
While honest folk do the dying  
I don't care what was said  
Watch the water turn red  
and leaving this battle, am I  
and you'll get no more killing from me (x2)  
If it's truly my fate  
Then god lose the state  
and I'll run for the rest of my days  
So, ma'am  
Please, take my sword and revolver  
It's the least that this soldier might offer  
For the price you could fetch  
For an officer's arm  
May pay for the grave of your son  
and I've gone  
To where guilty men do their running  
Their hiding, their sleeping, their slumming  
I don't care what was said  
Watch the water turn red  
and this shadowy conscience is mine  
and you'll get no more killing from me (x2)  
If it's truly my fate  
Then god lose the state  
and I'll run for the rest of my days  
and you'll get no more killing from me (x2)  
If it's truly my fate  
Then god lose the state  
Then I'll run for the rest of my days
